

CHAIN OF CUSTODY CERTIFICATION

Conifex is committed to transparent and responsible fiber accounting.

The Conifex Chain of Custody certification verifies that Conifex has an accounting system to trace the flow of wood from our certified forests through Conifex's facilities. The Conifex accounting system meets the requirements of a particular certification standard and allows companies to identify the proportion wood in the end product that originated from certified sources.

Conifex has implemented, and will maintain, operational controls and systems to meet the requirements specified in the PEFC standard for chain of custody of forest based products.
